# HG Series Concrete Placing Boom

Since the first placing boom was independently researched and developed in 1989, Changsha Zoomlion Heavy Industry Science and Technology Development Co.Ltd have always devoted themselves to the development and manufacture of concrete placing booms and have designed the series with a radius of 10cm to 40cm. The scope includes the Free Standing Mobile, Inner Climbing Barge, Tower, etc.. The HG series placing boom is an sophisticated product with independent intellectual property rights. It is based on the advanced finite element analysis and dynamics, and has been developed by adopting frontier material and control technology. Due to its high reliability, excellent operating function and perfect service, the HG series placing boom has become the top commodity in demand by users from home and abroad.

## Reliable electric system

The main electric components are products of world-famous companies such as the Omron Company in Japan or the Schneider Company in France.

**OMRON**

**Schneider**  
 Electric

## Leading-edge fully hydraulic drive system

The machine is fully hydraulic and can slew 360°. The balance valves are products of the company Oilcontrol in Italy. And the solenoid directional valves are products of the company Rexroth in Germany.

**Oilcontrol**

**Rexroth**  
Bosch Group

## Best applicability

The booms of the Free Standing, Mobile, Inner Climbing, Barge, Tower, etc. can be adapted to different construction environments.

## Wide range of adaptability

There are devices for preventing the isolation of concrete, which improves the quality of the project, by avoiding blockage of the pipe, thus prolonging its operating life.

## High safety

The machine is extremely safe due to a lot of protection devices.

## Low operating costs

The operating expenses are very low: the delivery bends are precision casting. The thickness of the bend is different at different points; that means that the wear out points are thicker and thus the service life is longer.
