

Vibratory Road Roller

YZ Series

OLIVIER

OLIVIER GROUP is the exclusive dealer for

 **ZOOMLION**

Special innovation and leading the technical innovation trend

For over 30 years, we have devoted ourselves to research and put the vibrating theory into practice thus impelling the progress and innovation of vibratory rollers and set technological standards.

According to Chinese national standards, we have absorbed the essence of domestic technology and developed fully hydraulic singular and double drive rollers and tandem vibratory rollers, with the following characteristics: high efficiency, reliability, environment friendly and intelligent design. We are leading the new technical innovation trend in the vibratory roller industry.

Superior quality and high reliability due to leading brands

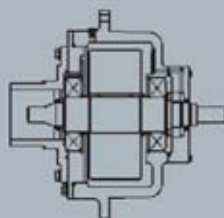

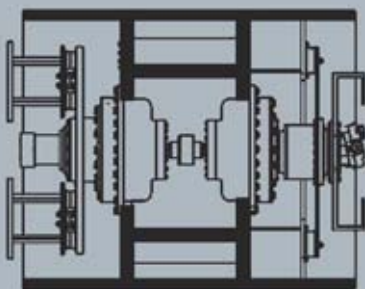

Engine of world-famous brand ensures stable power output.

Specific vibratory drum design with a special low-speed sealing structure considerably increases reliability and extends the maintenance period.

Self-lubrication technology makes sure the bearings are well and fully lubricated thus improving their service life.

Strengthened supporting structure enjoys good rigidity by using world famous brand bearings. This increases the service life greatly (almost 100%).

The tandem vibratory roller is equipped with two separate spraying systems to assure reliable working all the time. Electrical components of famous brands such as HELLA and CURTIS are used to assure the reliability of the electrical system.

Powerful and highly-efficient engine proves to be top class

World famous engine ensures a reliable and stable power output in different working conditions.

Famous brand radiator with great cooling ability, high efficiency and excellent quality improves the radiating capability of the power system considerably.

Hydraulic system equipped with a world famous high-pressure pump and motor improves efficiency, minimizes noise and realizes stepless speed changes easily.

Hydraulic system equipped with a world famous high-pressure pump and motor improves efficiency, minimizes noise and realizes stepless speed changes easily.

Safe and environment-friendly guarantee of profits

Three braking systems such as the travelling brake system, parking brake system and emergency brake system ensure safe and reliable driving.

Mid-position protective function assures safe and reliable start-up.

All sorts of failure displaying and alarming functions protect your safety all the time.

The vibratory roller powered by the imported YZ12 engine takes the lead in attaining CE standards.

Compacting meter is optional to meet more requirements of our customers.

Famous high pressure pump and motor

Imported German Deutz original engine

Imported American Dana original driving axle

Streamline appearance and ergonomic design assure comfort and labor saving

Spacious cab with luxurious interior decoration and broader views.

Adjustable and shock absorption seat ensures comfortable operation.

Zoomlion patented "T" air channel in the air conditioner blows winds from both sides behind the driver making the air more agreeable.

Full hydraulic stepless speed control lowers the amount of work of the operator and makes operation easier, more comfortable and convenient.
